"ALL PAKISTAN" FIRST FORECAST OF GRAM CROP FOR THE YEAR 1953-54

No. F. 4-5-Stat-53-54.—The first forecast of the area under gram crop for the year 1953-54 is 2,365,000 acres as against 2,236,000 acres reported in the first forecast of the previous year, and shows an increase of 5.8 per cent. The acreage reported in the final forecast of last year was 2,232,000 acres.

With the exception of Baluchistan and Bahawalpur State, there has been a general increase in the acreage of this crop in Pakistan. A major increase has occurred in the Punjab. The increase in the Punjab, and N.-W. F. Province is due to favourable weather conditions at the time of sowing, and that in Sind is attributed partly to good inundation and partly to favourable market prices.

Sowing commenced on normal dates.

The condition of the crop is normal.
