Applications for Patents

The dates shown in brackets are the dates claimed under Section 78-A of the Act

16th November 1959

1059. Sabbir Ali Shah.—Improvement in and|or relating to a composition of a hydraulic brake fluid oil.

1030|59. Henri Joseph Marie Clement, M. D.—Preparation of new watersoluble enzymes.

1031|59. Maschinenfabrik Augsburg-Nurnberg A. G.—Improvements in or relating to air-compressing compression-ignition internal combustion engines.

1332|59. Mirza Muhammad Shaffi, and Mirza Ghulam Nabi.—Push Pump.

17th November 1959

1033|59. English Steel Corporation Limited.—Improvements in or relating to automatic couplers for rail vehicles. (20th November, 1958).

1034|59. Imperial Chemical Industries Limited.—New Azo Dyestuffs. (28th November, 1958).

1035|59. Chas. Pfizer & Co., Inc.—Antibiotic Compositions and Process.

1036|59. Ciba Limited.—Vaccine.

18th November 1959

1037|59. The General Electric Company Limited.—Improvements in or relating to the production of carbon. (21st November, 1958).

1038|59. The Imperial Tobacco Company (of Great Britain and Ireland) Limited.—Improved tobacco product and method of its production. (19th November, 1958).

19th November 1959

1039|59. Knud Abildgaard, trading as Lovens Kemiske Fabrik Ved A. Kongsted.—Method for the production of a new testosterone derivatives. (19th November 1958).

20th November 1959

1040|59. E. I. Du Pont De Nemours and Company.—Product and Process.
(Patent of Addition to No. 469|58).

1041|59. Knud Abildgaard, trading as Lovens Kemiske Fabrik Ved A. Kongsted.—Method for the production of a new testosterone derivatives.

21st November 1959

1042|59. Montecatini, Societa Generale Per L'Industria Mineraria E Chimica.—Improvements relating to the Polymerisation of 1, 3-Butadiene.

1043|59. Dunlop Rubber Company Limited.—Improvements in or relating to Pneumatic tyres and to wheel and Pneumatic tyre assemblies. (22nd November, 1958).

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any of the applications referred to below may at any time within four months of the date of this *Gazette of Pakistan*, give notice at the Patent Office in the prescribed Form No. 6 of the Patents and Designs Rules, 1933.

The six-figure numbers shown in the right hand side are those given to applications on acceptance of the complete specifications and under which the specifications will be printed and all subsequent proceedings will be taken.

A limited number of printed copies of the specifications will be available for sale at a cost of Re. 1 each (postage extra, if sent ont of Pakistan), direct from the Manager of Publications, Central Publication Branch, Pakistan Secretariat, Block No. 44, Karachi. Requisitions for the supply of printed specifications should be accompanied by the numbers of the specifications.

If required, typed copies of specifications which are open to public inspection, can be supplied by the Patent Office on payment of the prescribed charges which may be ascertained on application to the Office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

142|58. Usines Decoufle.—An improved method of, and apparatus for, forming a tobacco filler in a tobacco-manipulating machine such as a cigarette-making machine. (26th February, 1957). **109389.**

A method of forming a tobacco-filler comprises the steps of conveying tobacco on the surface of a travelling conveyor in the form of a filler, trimming surplus tobacco from the filler and applying suction to the tobacco which is being trimmed so as to hold such tobacco suctionally to the conveyor while it is being trimmed.

161|58. Josef Bottger.—An internal combustion engine with direct fuel injection and compression ignition. **109390.**

An internal combustion engine with a combustion space having the form of a body of revolute and provided with an injection nozzle discharging two jets in different lengths characterized in that a portion of short jet impinges beyond the wall of combustion space while the longer jet impinges at the wall of combustion space, lower below its edge.

188|58. Parke Davis & Co.—Methods for producing phenylcyclohexane compounds. **109391.**

Process for producing 1-phenylcyclohexane compounds characterized in that a 1-phenylcyclohexyl-(substituted)-amine is reacted with an aldehyde or ketone or an acylating agent and the reaction product is subjected to reduction.

194|58. Parke, Davis & Company.—Process for the production of new heterocyclic compounds and acid addition salts thereof. **109392.**

A solution of butyllithium with theophene is reacted with N-cyclohexylidine isopropylamine to produce 2-[1-(1-isopropylamino) cyclohexyl] thiophene.

403|58. Stamicarbon N. V.—Process of preparing urea. **109393.**

An improved process for the production of urea wherein the melt from the autoclave is introduced into the top of the first of two rectifying columns and expanded to a pressure of 12-30 atm, the liquid in the bottom of this column being heated to a temperature of 110-150°C and continuously discharged and the gases issuing from this column are washed with liquid ammonia in second rectifying column.

411|58. Montecatini, Societa Generale Per L'Industria Mineraria e Chimica and K. Ziegler.—Method of preparing shaped articles from high molecular weight highly crystalline polypropylene. **109394.**

A method of preparing shaped articles from high molecular at highly crystalline wherein polypropylene is in form of powder, the powder is introduced into a mould and subjected to high pressure and temperature whereby polyprpoylene becomes a solid, machinable, totally coherent mass.

448|58. Merck & Co., Inc.—Process for preparing disulfamylaniline compounds. (21st June, 1957). **109395.**

A process for preparing a disulfamylaniline compound comprises reacting chlorosulphonic acid with an aniline compound, adding a chlorinating agent heating the reactants to form a disulfonyl chloride compound and converting the disulfonyl chloride compound thus obtained to the corresponding disulfamyl derivative by reaction with ammine.

511|58. Imperial Chemical Industries Limited.—Process for drying metal articles. (31st July, 1957). **109396.**

A process for drying water contaminating surfaces of articles of metal or other non-absorbent material which comprises treating the said surfaces with a chlorinated hydrocarbon solvent containing dissolved therein a small proportion of a cationic surface active agent.

671|58. Whitin Machine Works.—Doffing apparatus for textile machine. **109397.**

In a textile machine having bobbin supporting spindles, in combination, a yarn guide for each spindle a member associated with each spindle which is effective to prevent ballooning of yarn being wound on the bobbin on said spindle and means to raise and rear wardly displace said yarn guide to facilitate doffing.

12|59. Wetzell Gummiwerke Aktiengesellschaft.—Improvements in sliding clasp continuous fastener. (8th January, 1958). **109398.**

A sliding clasp continuous fastner having means for sealing an opening in the joint at the closing end by the plough and comprising a cover over the opening and secured to the flexible material.

224|59. F. Hoffmann-La Roche & Co. Aktiengesellschaft.—Process for the manufacture of dibenzocycloheptaene compounds. **109399.**

5-(W-dimethylaminopropyl)-dibenzo [a, e] cyclohepta [1, 5] diene is obtained by condensing dibenzo-[a, e] cyclohepta [1, 5] diene-5-one, with unsaturated aromatic organometallic compounds e.g. W-dimethyl aminopropyl of magnesium compound.

259|59. Jamiluddin Ltd.—Biri wrappers (substitute of biri leaves). **109400.**

Process for the manufacture of biri wrappers wherein the raw material viz., tobacco stems and roots and paddy straw upto a maximum quantity of

double the weight of tobacco stem are chopped into small pieces and kept into a tank filled with water for about 12 to 18 hours and then boiled, using first sodium hydrochloride, 5% of the weight of the raw material, then sodium bicarbonate of the equal weight of the salt adding to the boiling material which is kept boiling for 6 to 8 hours after which it is taken out, washed and pressed into paper form.

391|59. Emile Breetvelt.—Improvements in or relating to the cutting of bricks slate and like building material. **109401.**

A brick cutter comprising a frame of rolled steel sections, a hydraulic jack mounted therein, a bar having a line of upwardly projecting spikes and supported by the jack, guides for the bar, spring means, etc.

395|59. Usines Decoufle.—An improved method of and apparatus for forming a continuous tobacco filler in a tobacco-manipulating machine such as a cigarette-making machine. **109402.**

(Divided out of No. 142|58, Sl. No. 109389).

Ante-dated to 14-2-58.

A method of forming a tobacco filler on a conveyor comprises the steps of causing a current of air to flow towards the conveyor and feeding tobacco into the current of air so as to be impelled thereby to the conveyor on which it builds up and forms a filler.

452|59. May & Baker Limited.—Improvements in substituted acetamides. (2nd June, 1958). **109403.**

A process for the preparation of a substituted acetamide consists in condensing P-methylsulphonyl-benzylamine hydrochloride with a dischloroacetylating agent.

472|59. Cardwell Westinghouse Company.—Railway car draft gear. **109404.**

Railway car draft gear, including a longitudinally extending casing having an open end and a closed end spring means in the said casing a friction mechanism at the open end of the casing and follower means between said friction mechanism and free end of the said spring means.

489|59. Schlumberger Well Surveying Corporation.—Apparatus for investigating earth formations. **109405.**

An apparatus for investigating earth formations traversed by a borchole comprises in combination a non-conductive mandrel adapted to be moved through a borehole, a coil system secured to the mandrel and an electrode system secured to the mandrel, the apparatus being characterised in that the electrode system is positioned about the coil system.

580|59. Parke, Davis & Company.—Method for producing phenylcyclohexane compounds. **109406.**

(Divided out of No. 188|58, Sl. No. 109391).

Ante-dated to 26-2-58.

Process for the production of new di-aliphatically substituted amino compounds characterised in that the cyano group of a 1-di-aliphatically substituted amino-1-cyanocyclohexane compound is replaced with a phenyl radical thereby producing a 1-phenylcyclohexyl di-aliphatically substituted amino compound.

581|59. Parke, Davis & Company.—Method for producing phenylcyclohexane compounds. **109407.**

Ante-dated to 26-2-1958.

(Divided out of No. 188|58, Sl. No. 109391).

Process for the production of new di-aliphatically substituted amine compounds characterised in that a phenyl radical is introduced into an acid addition salt of an N-(1-cyclohexenyl)-substituted amine thereby producing a 1-phenylcyclohexyl di-aliphatically substituted amine.

583|59. Parke, Davis & Company.—Process for the production of new heterocyclic compounds and acid addition salts thereof. **109408.**

(Divided out of No. 194|58, Sl. No. 109392).

Ante-dated to 28-2-1958.

1-cyanocyclohexyl dimethylamine is reacted with 2-thienyl magnesium bromide to obtain 2 [1-(1-dimethylamino)-cyclohexyl]-thiopane.

584|59. Parke, Davis & Company.—Process for the production of new heterocyclic compounds and acid addition salts thereof. **109409.**

(Divided out of No. 194|58, Sl. No. 109392).

Ante-dated to 28-2-1958.

α-ethylaminocyclohexane carbonitrile and 2-thienyl lithium solution are reacted to produce 2-[1-(1-ethylamino) cyclohexyl] thiophene.

585|59. Parke, Davis & Company.—Process for the production of new heterocyclic compounds. **109410.**

(Divided out of No. 194|58, Sl. No. 109392).

Ante-dated to 28-2-1958.

2-[1-cyclohexyl]-thiophene compounds are reacted with alkali metal hypohalide in cold to produce a new compound.

637|59. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning.—Azo-dyestuffs insoluble in water and process for their manufacture. **109411.**

A process for the manufacture of a water-insoluble azo dyestuff consists in coupling in substance a diazonium compound of an amine, on the fibre or on another, substrutum with an arylamide of an aromatic or heterocyclic o-hydroxy-carboxylic acid or acyl-acetic acid free from groups imparting solubility in water, and the dyestuff so obtained is treated with an agent yielding metal.

744|59. Slazengers Limited.—Improvements in or relating to sports rackets. (18th August, 1958). **109412.**

A method of manufacturing a sports racket comprising drawing a preformed sleeves on to the frame from end of the open joint to extend over at least part of the head frame and attaching the sleeve to the frame by a binder medium for pressure.

863|59. Stamicarbon N. V.—Preparation of azacyclo-2-3-alkene-2-chloro-N-carbochloride. **109413.**

W-lactam is reacted with phosgene to obtain azacyclo-2 : 3-alkene-2-chloro-N-carbochloride.

879|59. Pirelli Societa Per Azioni.—Improvements in or relating to multi-conductor telecommunication cables for audio and carrier frequencies. (30th June, 1959). **109414.**

A multi-conductor telecommunication cable for audio-and carrier frequency transmission comprising at least one group of five conductors namely a central one and four outer conductors arranged symetrically around the central conductor.

Sealing Fees Due

Notice is hereby given that patents may now be sealed on the applications referred to below. If it is desired that a Patent should be sealed, a request on the prescribed Form No. 8, accompanied by the Fee of Rs. 30, should be sent to the Controller of Patents and Designs, The patent Office, Muhammadi House, McLeod Road, Karachi.

The numbers on the right hand side are the application numbers by which the applications were designated prior to acceptance.

Specifications open to inspection under Section 78-A

The following specifications have during the past week become available for inspection by the public, in accordance with the provisions of Section 78-A(3)

(b). They may be inspected at the Patent Office :—

411|59. Improvements relating to cabinets for refrigerators.

413|59. Improvements relating to oil immersed fuses.

423|59. Improvements in or relating to heterocyclic compounds.

424|59. Improvements relating to vehicle suspension systems.

Proceeding under Rule 53 of the Patents and Designs Rules, 1933

In the matter of Patent No. 104528, granted to Combustion Engineering, Superheator, Inc., the following entry has been made in the Register of Patents :—

"In pursuance of an application received on 29th October 1959, the name of the Patentees Combustion Engineering Superheater, Inc., has been altered to Combustion Engineering, Inc.".

Registration of Assignments, Licences, etc., under Section 63 of the Act

In the matter of Patent No. 102277, dated the 30th August 1949, the following entries have been made in the Register of Patents :—

"In pursuance of an application received on the 3rd November 1959, HOOVER LIMITED, of Perivale, Greenford, in the county of Middlesex, England, a company registered under the laws of Great Britain, registered as proprietors by virtue of assignment, dated the 19th May 1959, and made between HOOVER (WASHING MACHINES) LIMITED of the one part and HOOVER LIMITED of the other part".

Patents Sealed

Notice No. 3|6|57-P&D, dated the 23rd November 1959.

Printed specifications are not yet available in respect of all the Patents listed below. In such cases, the Letters-Patent Documents are no longer being retained in the Office but are being despatched in the absence of the printed specifications. Attention is invited to Special Notice No. 3|6|57-P&D in this connection :—
