GOVERNMENT OF EAST PAKISTAN
DIRECTORATE OF AGRICULTURE
MEMORANDUM

The Final Estimate of Tea Crop of East Pakistan for 1960-61

Dated Dacca, the 15th February 1961.

[*Note*—Tea is a perineal ever green plants having an economic bearing. It is grown in undulating and hilly lands. It is used to be planted in the districts of Sylhet and Chittagong. But this year the plantation of the crop has been extended to the districts of Chittagong Hill Tracts and Comilla. Plucking of Tea leaves begins from April and continues up to the month of November every year.]

Character of season—The weather condition was not favourable as there was continued draught during the plucking period.

Acreage—The total area under the crop in East Pakistan has been estimated at 79,367 acres as against 78,000 acres shown in the corresponding estimate of last year. The increase in area is mainly due to the new plantation in the existing gardens.

Production—The total yield of the crop for the Province has been estimated at 42 million pounds as against 57 million pounds shown in the corresponding estimate of last year. The decrease in production is due to severe draught.

A. RAHIM CHAWDHRY,
Director of Agriculture.

The First and Final Estimate of Betelnut crop of East Pakistan for 1960-61

[*Note*—The Betelnut crop is grown mainly in Southern districts of the Province. It is generally planted during the rainy season. It bears flowers after 5 to 8 years from the time of its planting. It is generally harvested during the months of October to December.]
This estimate covers the period from February to December 1960.

Character of the Season—The weather condition was favourable at the time of planting. There was constant drought throughout the Province in flowering stage of the crop. Although the subsequent weather was favourable for the standing plants, a large number of plants were completely damaged due to cyclone in October 1960.

Acreage—The total area under Betelnut crop in this Province is estimated at 204,000 acres this year as against 217,300 acres shown in the estimate of last year. The decrease in area is mainly due to damage of plants by cyclone. The Division wise acreage of this year as well as of last year are furnished below:—

Name of the Division.	Current year's crop for 1960-61.	Last year's crop for 1959-60.
Dacca	8,000	7,600
Chittagong	66,600	80,800
Rajshahi	2,400	2,300
Khulna	127,000	126,600
Total ..	204,000	217,300

Outturn—The average outturn of the crop for the Province as a whole is estimated at 59 per cent. of the normal of this year, as against 70 per cent. of the normal shown in the estimate of last year. The decrease in outturn is due to drought at flowering stage and cyclone in October 1960.

Yield—On the basis of 59 per cent. as the average outturn and 14 maunds as the normal rate of yield per acre, the total yield of the crop for the Province works out to 61,900 tons this year as against 78,200 tons of last year. The Divisionwise production figures of this year as well as of last year are furnished below:—

Name of the Division.	Current year's crop for 1960-61.	Last year's crop for 1959-60.
Dacca	2,550	2,410
Chittagong	18,590	28,745
Rajshahi	955	820
Khulna	39,805	46,225
Total ..	61,900	78,200

The decrease in yield is due to decrease in acreage and outturn due to unfavourable weather condition.

A. RAHIM CHAWDHRY,
Director of Agriculture, East Pakistan.
