"ALL PAKISTAN" FIRST ESTIMATE OF SUGAR CANE CROP FOR THE YEAR 1962-63.

No. AE|ST-E(3)R|63.—Area.—According to the Estimate for the year 1962-63, the area under sugar cane crop amounts to 1,364,000 acres against 1,350,000 acres reported in the corresponding estimate of the previous year, and shows an increase of 8.4 per cent. In East Pakistan the area has increased by 7.5 per cent on account of the favourable weather conditions at the time of plantation and high prices of sugar and Gur in the preceding season.

There has been a general increase in area throughout West Pakistan with the exception of Peshawar division. The increase may be attributed to favourable weather conditions and regular supply of water coupled with cultivator's keen interest in sugar cane. The high prices of Gur in the market. In Peshawar division, the area showed a nominal decrease of 0.5 per cent. The provincial increase stood at 8.6 per cent.

The statement showing division-wise area under the crop for the year 1962-63 is given below:—

"ALL PAKISTAN" FINAL ESTIMATE OF SESA- JIM CROP FOR THE YEAR 1961-62.

No. AE|ST-E(7)R|62.—*Area.*—The Final Estimate of
area under Sesamum crop for the year 1961-62 amounts
to 2,50,400 acres, compared to 211,200 acres reported
in the corresponding estimate of the previous year,
and shows an increase of 18.6 percent.

In East Pakistan, the area under winter and summer saimum crop recorded a decrease and increase of 5 and 13.0 percent respectively, over the previous year's crops. The decrease in winter sesamum crop occurred due to the closure of Kaptai dam in Chittagong Hill Tracts which is the major Til Growing district of East Pakistan. The area under summer saimum crop increased on account of favourable weather conditions. The provincial increase stood at 3 percent.

In West Pakistan there was a general increase in area under sesamum crop with the exception of D. I. Khan and Sargodha Divisions, on account of beneficial rains during the pre-sowing period and high prices of the commodity in the market in the previous season as a

result of the Government decision to order the use of at least 5 percent of sesamum oil in vegetable ghee production. The decrease in D.I. Khan and Sargodha Divisions may be attributed to failure of rains. The overall provincial increase is 37.5 percent.

Production.—The production of sesamum crop for 1961-62 is estimated at 36,715 tons as against 31,290 tons reported in the corresponding estimate of previous year and shows an increase of 17.3 percent.

In East Pakistan the production of winter sesamum crop has gone down nominally by 0.2 percent due to corresponding decrease in area. The Summer sesamum crop increased by 14.3 percent and may be explained by favourable weather conditions and more area sown under the crop.

There has been a general increase in production through West Pakistan except in D.I. Khan and Sargodha divisions and is attributable to corresponding increase in area and fair weather conditions during the growth period. The decline in D.I. Khan and Sargodha divisions is due to less area sown under the crop.

The division-wise statement showing area and production of Sesamum crop during 1961-62 is attached.

No. 3(1)61-Admn.—(1). In supersession of Notification No. E. 27(41)59-Admn., dated the 2nd June 1962, Mr. A. H.
