## The First Estimate of Sugarcane Crop of East Pakistan for 1963-64.

(Note—The Estimate deals with the preliminary estimate of acreage under Sugarcane Crop and covers the period from December 1962 to the end of March 1963.)

Character of the season—The weather condition was favourable at the time of sowing and subsequent weather was also suitable to the growth of the crop.

Acreage—The total area planted with this crop in East Pakistan is estimated at 305,100 acres this year as against 303,000 acres shown in the corresponding estimate of last year. The increase in area in comparison with that of last year's corresponding estimate is due to high price of Sugarcane and Gur and favourable weather.
