estimated at 63,300 acres as against 62,500 acres estimated during 1962-63. The area has thus increased by 1.3 per cent. The increase is attributable to high price of the crop particularly before the sowing time in some districts and also to favourable weather conditions.

In West Pakistan, the area under the crop stands at 40,300 acres as against 36,100 acres reported in the corresponding estimate of last year, registering an increase of 11.6 per cent. The increase has been shared by all the divisions except Rawalpindi, Bahawalpur, acreage, decreased by 5.9 per cent. The decrease was due to the crop being affected by continuous dry weather in some of the districts.

Production in West Pakistan, on the other hand, increased by 20.4 per cent which is due to increased acreage and congenial weather conditions during the growth of the crop.

A statement showing division-wise area and production of onion crop alongwith increase or decrease for the year 1963-64 is given overleaf.

DEPARTMENT OF MARKETING INTELLIGENCE AND AGRICULTURAL STATISTICS

Rawalpindi, the 12th September 1964

"ALL PAKISTAN" FINAL ESTIMATE OF ONION CROP FOR THE YEAR 1963-64 RELEASED BY THE DEPARTMENT OF MARKETING INTELLIGENCE AND AGRICULTURAL STATISTICS.

No. MI|AS-SC(1)|64.—Area.—The area under onion crop in Pakistan for the year 1963-64 has finally been estimated at 103,600 acres as against 98,600 acres in the corresponding estimate of the previous year. This shows an increase of 5.1 per cent.

In East Pakistan, the area under onion crop has been estimated at 63,300 acres as against 62,500 acres estimated during 1962-63. The area has thus increased by 1.3 per cent. The increase is attributable to high price of the crop particularly before the sowing time in some districts and also to favourable weather conditions.

In West Pakistan, the area under the crop stands at 40,300 acres as against 36,100 acres reported in the corresponding estimate of last year, registering an increase of 11.6 per cent. The increase has been shared by all the divisions except Rawalpindi, Bahawalpur, Quetta and Kalat and is due to favourable weather conditions and high pre-sowing market rates. The decrease in Rawalpindi, Bahawalpur, Quetta and Kalat Divisions is due to scarcity of canal water and lack of soil moisture.

Production.—Production of onion crop in Pakistan during the year 1963-64 has been estimated at 2,84,400 tons as against 2,66,300 tons in the previous year; thus registering an increase of 6.8 per cent.

In East Pakistan the production, despite increased acreage, decreased by 5.9 per cent. The decrease was due to the crop being affected by continuous dry weather in some of the districts.

Production in West Pakistan, on the other hand, increased by 20.4 per cent which is due to increased acreage and congenial weather conditions during the growth of the crop.

A statement showing division-wise area and production of onion crop alongwith increase or decrease for the year 1963-64 is given overleaf.

Rawalpindi, the 22nd September 1964

"ALL PAKISTAN" FINAL ESTIMATE OF POTATO CROP FOR THE YEAR 1963-64 RELEASED BY THE DEPARTMENT OF MARKETING INTELLIGENCE AND AGRICULTURAL STATISTICS.

No. MI|AS-VF(1)|64.—Area.—According to final estimate, the area under potato crop for the year 1963-64 has been placed at 174,000 acres as against 174,900 acres recorded in the corresponding estimate of the preceding year 1962-63, thus showing a decrease of 0.5 per cent.

In East Pakistan, the acreage under potato crop has declined by 3.7 per cent in comparison to last year's acreage. The decline has occurred mainly in Rajshahi and Khulna divisions and is assigned to increased cultivation of 'Aman' paddy.

West Pakistan, on the other hand, has recorded a significant increase of 13.7 per cent. The general increase in this Province is shared by all divisions with the exception of Peshawar and Sargodha divisions. The decline in Peshawar division has been noticed due to diversion of more area to other cash crops and in Sargodha division due to inadequacy of water-supply at the time of sowing. The increase in West Pakistan however, could not offset the decrease in the Eastern Wing of the country.

Production.—The production of potato crop for the year 1963-64 stands at 453,100 tons as compared to 472,700 tons recorded in the final estimate of 1962-63 and thereby shows a decrease of 4.1 per cent.

In East Pakistan the production has experienced a fall on account of reduced acreage combined with prevalence of drought in some districts which affected the yield adversely.

In West Pakistan, however, the production has increased throughout the province, Sargodha and Quetta divisions being the only exceptions. The increase has been attributed to corresponding larger area and extensive use of fertilizer. The yield suffered a set-back on account of continued severe frost during growth period but the position later on improved considerably. The decrease in Sargodha division was due to decreased acreage.

A statement showing division-wise area and production of potato crop is given over-leaf.

"ALL PAKISTAN" FINAL ESTIMATE OF GRAM CROP FOR THE YEAR 1963-64 RELEASED BY THE DEPARTMENT OF MARKETING INTELLIGENCE AND AGRICULTURAL STATISTICS.

No. MI|AS-E (12)|64.—Area.—The area under gram crop for the year 1963-64 has been finally estimated at 2,879,000 acres as against 3,151,000 acres recorded in the final estimate of 1962-63, thereby showing a decrease of 8.6 per cent.

In East Pakistan, there has been an overall decrease of 7.3 per cent in area, which is due to increased cultivation of competing Aman paddy.

West Pakistan, on the other hand, represents a mixed picture. While there has been increase in Peshawar, D. I. Khan, Rawalpindi, Lahore and Khairpur Division, there has been a considerable decrease in Multan, Bahawalpur, Sargodha and Hyderabad Divisions. The increase in area in Peshawar, D. I. Khan, Rawalpindi, and Lahore Divisions has been due to seasonalised rains and adequate supply of canal water and in Khairpur division due to opening of the Gudu Barrage. The decrease in Sargodha, Multan and Bahawalpur Divisions is due partly to inadequate water supply in canals and in-sufficient rainfall and partly to less lucrative return from the crop in comparison to other competing crops. The increase in some divisions, however, could not offset the decrease in some of the others and the provincial decrease has stood at 8.7 per cent.

Production.—The production of gram in 1963-64 has been placed at 633,000 tons as against 701,000 tons reported in the corresponding estimate of 1962-63, and represents a decrease of 9.7 per cent.

In East Pakistan, the production showed a decrease of 2.9 per cent which is due to decreased acreage.

Production declined to a significant extent in West Pakistan also where the decrease stands at 10.0 per cent which is attributed to the corresponding reduced acreage and to severe continuous frost during January. Hail and storm during the maturing period also affected the crop in some parts of Rawalpindi division.

A statement showing division-wise area and production of gram crop for the year 1963-64 is given overleaf.
