DEPARTMENT OF MARKETING INTELLIGENCE AND AGRICULTURAL STATISTICS

Rawalpindi, the 24th August 1966

"ALL PAKISTAN" FINAL ESTIMATE OF OTHER RABI PULSES FOR THE YEAR 1965-66 RELEASED BY THE DEPARTMENT OF MARKETING INTELLIGENCE AND AGRICULTURAL STATISTICS.

No. MI|AS MC(5)|65.—Area.—The final estimate of other rabi pulses for the year 1965-66 places the area at 301,900 acres against 312,100 acres when compared with the figures of the preceding year (1964-65). It has thus registered a decrease of 3.3 per ceent.

In East Pakistan a decrease of 4.4 per cent has been noticed inspite of an increase of 8.9 and 1.0 per cent in Dacca and Rajshahi divisions respectively. The decreased acreage in Chittagong and Khulna divisions is due to the damage caused by cyclone in Chittagong district and a sharp decline in the cultivation of crop in Barisal district.

In West Pakistan, on the other hand, the acreage increased by 5.3 per cent. The only division reporting decreased acreage was Sargodha which has been attributed to acute shortage of water supply and absence of rains.

Production.—The production of other rabi pulses for 1965-66 has been estimated at 85,900 tons against 92,100 tons reported last year (1964-65) and thereby showing a decrease of 6.7 per cent.

In East Pakistan the production fell by 6.1 per cent which may be ascribed to decrease acreage.

In West Pakistan, a decrease of 12.9 per cent has been noticed inspite of increased acreage. The decrease in production may be assigned to continuous drought conditions during the growth of crop.

A divisionwise statement showing area and production of other rabi pulses for the year 1965-66 is given below :—
