DEPARTMENT OF MARKETING INTELLIGENCE AND AGRICULTURAL STATISTICS

Rawalpindi, the 27th March 1968

'ALL PAKISTAN' THIRD ESTIMATE OF RICE CROP FOR THE YEAR 1967-68 RELEASED BY THE DEPARTMENT OF MARKETING INTELLIGENCE AND AGRICULTURAL STATISTICS.

No. MI/AS-E(8)/68.—Area.—According to the third estimate for the year 1967-68 the area under rice crop has been placed at 27,839,000 acres as against 25,587,000 acres and 25,897,000 acres reported in the corresponding and final estimates of last year i.e. 1966-67. It shows an increase of 8.8 and 7.5 per cent, respectively over the two estimates of last year.

In East Pakistan, the area (including the area under boro) has increased to 24,422,000 acres from 22,205,000 acres of the corresponding estimate of last year registering an increase of 10.0 per cent which has been shared by all the divisions. The area under aus crop increased by 18 per cent, that under aman by 4.4 per cent and under boro crop by 28.6 per cent primarily due to extensive "Grow More Food" campaign launched by the Government thereby ensuring supply of better seeds, increased availability of irrigation water particularly through low lift pumps and greater reclamation of waste lands and favourable weather also added to this increase. There was keen enthusiasm among farmers to grow high yielding 'IRRI' variety of rice particularly in boro and aus season.

In West Pakistan, the area has increased from 3,382,000 acres of the corresponding estimate of last year to 3,417,000 acres this year, showing a nominal increase of 1.0 per cent which is mainly due to increase in the acreage in D. I. Khan, Rawalpindi, Lahore, Sargodha divisions. The availability of high

yielding paddy seed of IRRI variety, timely rains at the time of transplantation and adequate supply of canal water favoured the increase while there was some decrease in Hyderabad and Khairpur divisions due to unfavourable weather, fear of stemborer attack and breach in Pat feeder canal, in other divisions it was due to diversion of area to other competitive crops.

Production.—According to the third estimate the production of rice for the year 1967-68 (excluding boro crop) has been placed at 11,347,000 tons as against 9,916,000 tons and 9,936,000 tons of the corresponding and final estimates of last year. This records an increase of 14.4 and 14.2 per cent respectively.

In East Pakistan the production of rice (excluding boro) has increased from 8,593,000 tons of the corresponding estimate of the previous year to 9,881,000 tons this year thereby showing an increase of 15.0 per cent. The production of autumn crop has increased by 14.8 per cent and that of winter by 15.1 per cent due to corresponding increase in acreage and greater application of various inputs.

In West Pakistan the production stands at 1,466,000 tons as against 1,323,000 tons of the corresponding estimate of last year and shows an increase of 10.8 per cent. This is attributed to regular water supply at the time of transplantation coupled with increased application of fertilizer, plant protection measures introduction of high yielding IRRI paddy seed and favourable weather.

A statement showing the division-wise acreage and production of rice crop is given overleaf.

Rawalpindi, the 28th March 1968

"All Pakistan" first estimate of gram crop for the year 1967-68 released by the Department of Marketing Intelligence and Agricultural Statistics.

No. MI/AS-E(12)/68.—Area.—According to the first estimate for 1967-68 the area under gram crop has been placed at 3,063,000 acres as against 2,962,000 acres and 2,724,000 acres reported in the corresponding and final estimates of the preceding year and shows an increase of 3.4 and 12.4 per cent respectively.

In East Pakistan the area has been estimated at 152,000 acres as against 136,000 acres of the corresponding estimates of the previous year and shows an increase of 11.8 per cent. This rise shared by all

the divisions, is due to lucrative market prices and favourable weather conditions.

In West Pakistan the area has been recorded at 2,911,000 acres as against 2,826,000 acres of the corresponding estimates of last year. This shows an increase of 3.0 per cent. The increase, shared by all the divisions except Peshawar, Rawalpindi, Khairpur and Hyderabad is due to timely and sufficient rains at the time of sowing. The decline in acreage in the above mentioned divisions is due to diversion of area under wheat crop because of "Grow More Wheat" campaign launched by the Government.

A divisionwise statement showing the area under gram crop for 1967-68 is given below:
