No. 2144|71 :

DRAFT RECRUITMENT RULES FOR CIVILIAN GAZETTED POSTS (CLASS I AND II) IN THE ARMED FORCES HEADQUARTERS INCLUDING INTER-SERVICES ORGANISATIONS.

The following recruitment rules for civilian gazetted posts (Class I and II) in the Armed Forces Headquarters including Inter-Services Organisations are published for general information :—

PART I—GENERAL

These rules may be called the Recruitment Rules for civilian gazetted posts (Class I and II) in the Armed Forces Headquarters including Inter-Services Organisations.

In these rules unless the context otherwise requires—

(a) 'Government' means the President of Pakistan or a person authorised by the President to make appointment to the post concerned.

(b) '*Committee*' means *AFHQ Promotion Committee* as mentioned in Appendix I to these Rules.

(c) 'Board' means *AFHQ Recruitment Board* as mentioned in Appendix I to these Rules.

(d) 'Direct appointment' means an appointment made otherwise than by promotion or by transfer from another service|post|department.

(e) 'Examination' means the Departmental Examination or Test by the Service|Department concerned.

(f) 'Interview' means *viva-voce* examination only.

(g) 'Selection posts' means posts promotion to which is made strictly on merit (seniority playing its part only when other things are equal).

(h) 'Organisation' means the Hqrs. of the organisation where the vacancy|vacancies exist.

(i) 'Posts' means Civilian posts Class I|Class II (Gazetted) in the AFHQ including Inter-Services Organisations as shown in Appendix II to these Rules.

3. *Methods of Recruitment* :

(a) Recruitment to the posts shall be made by the following methods :—

(i) By direct appointment in accordance with Part II of these rules.

(ii) By promotion in accordance with Part III of these rules.

(iii) By transfer in accordance with Part III of these rules.

(b) The particular method by which recruitment shall be made to each post is given in the Appendix II to these Rules.

4. Where a cadre has definite quota reserved for departmental promotions and direct appointment, promotions against the departmental quota shall be made first and the posts reserved for direct appointment filled later.

In case of isolated posts, a roster shall be maintained to ensure the observance of the prescribed percentage for departmental promotion and direct recruitment.

5. (a) Vacancies in the posts which are filled by direct appointment shall be distributed as follows :—

1. Merit	..	20%
2. East Pakistan	..	40%

INTERNATIONAL
Grants and Appropriations (OP

3. West Pakistan :

(a) Former Punjab and Bahawalpur ..	23%	40%
(b) Former Sind, Khairpur, NWFP and Frontier States and Tribal areas, Baluchistan, Baluchistan States and Tribal Areas, Gilgit and Baltistan, Azad Kashmir, and Refugees from Jammu and Kashmir ..	15%	
(c) Karachi ..	2%	

(b) If any vacancy cannot be filled on account of non-availability of a suitable candidate of the province|region for which the vacancy is reserved, it should be carried over to the share of the province|region concerned and filled from that province|region in the next recruitment, except where it is certified by the Ministry of Defence that the post is of a highly technical nature and is to be filled in immediately and it is certified by the 'Board' that there is no possibility of getting any candidate from the province|region for which the vacancy is reserved, the vacancy may be filled on the basis of merit.

(c) 6% of the Provincial quota vacancies will be reserved for Scheduled Castes and they will be counted against the quota of the province|area in which the candidate concerned may be domiciled provided that if any such vacancy cannot be filled on account of non-availability of a suitably qualified Scheduled Caste candidate, it shall be filled on the basis of merit from amongst the candidates belonging to the province|region.

6. (a) Appointment to various posts shall be made on probation for periods mentioned against each post in Appendix II to these Rules.

(b) If in the opinion of Government the work or conduct of an officer on probation is unsatisfactory or shows that he is unlikely to become efficient, Government may discharge|revert him forthwith, or extend his probation for such further period, not exceeding the period as shown against each post in Appendix II to these Rules as the Government may think fit.

(c) On the satisfactory conclusion of the period of probation, Government may confirm a probationer in his appointment, provided a clear vacancy exists.

(d) If no action is taken by Government under sub-rule (b) or (c) of this rule, the period after the prescribed period of probation shall be treated as temporary engagement until further orders.

PART II—RECRUITMENT BY DIRECT APPOINTMENT

7. Recruitment by direct appointment shall be made by Government on the recommendations of the Board on the basis of examination|interviews.

8. A candidate who has married a person who is not a citizen of Pakistan shall not be eligible for appointment to the posts but if any candidate marries an Indian national after obtaining the permission of Government he will be regarded as eligible for appointment.

9. Examinations|Interviews for selection shall be held in Pakistan at such times and places as the Chairman of the Board may prescribe. The vacancies shall be advertised in the leading news-papers of Pakistan, and in addition, intimation of these vacancies shall be sent to the employment exchanges.

10. (a) The maximum number of candidates to be called up for interview may, at the discretion of the Chairman, be limited to such number as the Chairman may decide.

(b) If a limit is imposed and the number of candidates exceeds that limit, the Board shall select from the applicants those who shall be called up for interview and in doing so shall have regard to the suitability of the applicants, their academic qualifications, experience and Provincial|Regional quotas (*see* Rule 5) provided that all candidates possessing equal qualifications and experience etc., shall be called up for interview.

11. Applications for appointment shall be submitted to the Secretary of the Board in such form, on such date and in such manner and with such fees as the Secretary may prescribe.

12. All Government servants who fulfil the conditions laid down in these rules, shall be eligible for admission to the examination|interview, if permitted to compete by the competent authority in their Department|Office. Candidates who join Government service after sending their applications for admission to the examination|interview shall also obtain the permission of the Head of the Department concerned and send it to the Secretary of the Board immediately thereafter. A candidate who has ceased to be in Government service, shall submit with his application the original as well as a copy of his discharge|service certificate.

13. A candidate for appointment must be either a citizen of Pakistan or a person deriving his nationality from the State of Jammu and Kashmir, or a person whose temporary employment has been authorised by the President.

14. A candidate for appointment must be within the age limit prescribed for the post concerned, *vide* Appendix II to these rules. The age limits will be relaxable for Government servants.

15. (A) The maximum age limit may be relaxed by three years in the case of candidates belonging to :—

(d) The State of Jammu and Kashmir who live either in Pakistan or in the Azad Kashmir Territory, the Gilgit Agency or Baltistan, and the permanent residents of the Azad Kashmir Territory, the Gilgit Agency and Baltistan.

NOTE 1.—A candidate who claims to belong to a Scheduled Caste or the Buddhist Community will be eligible for the relaxation of age limit on production of a certificate in support of his claim from the District Magistrate or Political Agent or a Deputy Commissioner as the case may be.

NOTE 2.—Tribal candidates will be eligible for the concession mentioned at (c) above on production of a certificate from the Deputy Commissioner or the Political Agent concerned.

NOTE 3.—The relaxation of age limit for a person belonging to an area mentioned at (d) above will be admissible to a candidate who produces a certificate from the Ministry of Home and Kashmir Affairs, Government of Pakistan.

(B) In the case of *ex*-cadre Gazetted posts: the maximum age limit will be relaxed in the case of released/retired officers of the Armed Forces of Pakistan up to a maximum of 10 years or by the number of years an officer has actually served in the Armed Forces, whichever is less.

Released/retired officers of the Armed Forces will be preferred to other candidates provided they possess the requisite educational and other qualifications and are otherwise suitable.

The relaxation in age limits prescribed in this rule shall be permitted up to the maximum period of an individual concession and not by the total period of the concessions taken together, if admissible in any case.

16. A candidate must satisfy the Board that his character and antecedents are such as to make him suitable for appointment to the post concerned. Selection confers no right of appointment, unless Government are satisfied, after such enquiry as may be necessary, that the candidate is suitable in all respects for appointment to the post.

17. A candidate must possess the requisite educational qualifications as laid down in Appendix 11 to these Rules, in exceptional cases, for reasons to be recorded, the Board may call up for interview a candidate who may not possess all or some of the prescribed qualifications but who, in the opinion of the Board, has passed an examination which would enable him to discharge the duties of the post efficiently.

18. No candidate shall be admitted to the interview/test unless he holds a certificate of admission from the Secretary of the Board.

19. No recommendations, except those invited in the form of the application, shall be taken into consideration. Any attempt on the part of a candidate to obtain support for his candidature by other means shall disqualify him for admission.

20. Candidates selected by the Committee shall be placed in their order of merit and appointment shall be made strictly in that order as approved by Government with due regard to Provincial/Regional representation as prescribed in Rule 5, provided they are found suitable in all respects.

21. A candidate must be in good mental and bodily health and free from any physical defect likely to interfere with the discharge of his duties. A candidate who after such medical examination as Government may prescribe is found not to satisfy those requirements shall not be appointed.

PART III—RECRUITMENT BY PROMOTION OR TRANSFER

22. Promotions shall be made by selection from amongst eligible candidates (as indicated in Appendix II) on the recommendations of the Committee.

23. No persons shall have any claim to such promotion as a matter of right.

24. The selection for promotion shall be made from group of eligible officers which shall normally be limited to thrice the number of vacancies. If the required number of suitable persons do not, in the opinion of the Committee, become available from within the group, it may be extended at the discretion of the Chairman.

25. If the Committee is unable to recommend a suitable candidate for promotion it shall record its reasons in respect of each person interviewed and in that case the vacancy or vacancies shall be filled by transfer from amongst the persons eligible for transfer possessing the qualifications and experience, etc., for each post in accordance with Appendix II to these Rules.

26. Persons who fail to secure confirmation in their existing appointment on account of unsatisfactory service record will not be considered for promotion.

704/71. Unilever Limited (London, U.K.).—Extraction of protein from seed. (9th October 1970).

705/71. E.R. Squibb & Sons, Inc. (New York, U.S.A.).—Process for preparing cephalosphorins.

706/71. Takeda Chemical Industries, Ltd. (Osaka, Japan).—A method for the production of triazolobenzodiazepine derivatives.

7th October 1971

707/71. Pfizer Inc., (New York, U.S.A.).—Process for preparing 2-phenyl-as-triazine-3, 5(2H, 4H) diones and derivatives thereof and compositions containing said compounds. (7th September 1971.

708/71. C.A.V. Limited (Birmingham, U.K.).—Delivery Valves.

709/71. Dr. A. Wander Ltd. (Bern, Switzerland).—Improvements in or relating to organic compounds.

8th October 1971

710/71. Southywire Company (Georgia, U.S.A.).—Aluminum Alloy Conductor.

9th October 1971

711/71. Rca Corporation (New York, U.S.A.).—Signal processing for class b amplification.

712/71. Carlo Erba S.p.A. (Milan, Italy).—Process for the preparation of substituted 2, 2'-biimidazoles.

713/71. Merck Patent Gesellschaft Mit Beschrankter Haftung (Darmstadt, West Germany).—Isothiazolyl phosphorus compounds.

714/71. Sterling Drug Inc. (New York, U.S.A.).—Process for preparing thioxanthenes and intermidiates.

715/71. Nasir Ahmed Mirza and A. Sattar (Lahore, W. Pakistan).—A process for the production of pharmaceutical grade terpin hydrate from crude terpin hydrate.

APPLICATIONS ACCEPTED

Notice is hereby given that all persons interested in opposing the grant of Patents on any of the applications referred to below may at any time within four months of the date of this *Gazette of Pakistan* give notice at the Patent Office in the prescribed Form No. 6 of the Patents and Designs Rules, 1933.

The six-figures numbers shown in the right hand side are those given to applications on acceptance of the complete specification and under which the specifications will be printed and subsequent proceedings will be taken.

The figures shown within square brackets after the title of the invention indicate its classification index at acceptance.

Printed copies of the specification are available for sale at the old rate of Re. 1 per copy (postage extra) direct from the Manager of Publications, Central Publication Branch, Pakistan Secretariat, Block No. 44, Karachi. Printed Patent Specifications beginning with No. 11171 will however be sold at Rs. 3 per copy (postage extra if sent out of Pakistan). Requisition for the supply of printed specifications should be accompanied by the six-figures numbers of the specifications as shown under this list.

If required typed copies of the specifications which are open to public inspection can be supplied by the Patent Office on payment of the prescribed charges which may be ascertained on application to the Office.

The dates shown in the crescent brackets are the dates allowed under Section 78-A of the Act.

14/70. Merck & Co. Inc. (New Jersey, U.S.A.).—Method of inducing interferon and processes thereof. [Class 81(i) I 10.] 122037.

A method of improving animals (other than human beings) by inducing the formation of interferon in liking cells which comprises administering to said cells a complexed polymer selected from the group of poly-nucleotide, alternating co-polymers.

43/70. Electrospin Corporation (Ohio, U.S.A.).—A device for inserting a filament into a radially clamping grip. [Class 8(ii) E 6.] 122038.

A device for inserting a yarn into radially clamping group, which comprises a suction tube and a propulsion tube, one of the ends of the latter being intended for connection to a source of fluid under pressure and other of said ends forming an ejection nozzle for the fluid.

46/70. Velcro France (C'estune Societe anonyme), (Paris, France).—Improvement to flexible bands fitted with hooks for the fabrication of separable festening devices. [Class 89 (ii) D 3.] 122039.

A flexible band having hooks formed of threads of thermoplastic material for use in conjunction with a band having elements adapted to cooperate with the said hooks in order to constitute a separable fastening device, of the type in which the hooks are obtained by cutting one of the two arms of loops of thermoplastic threads, the said cutting operation being carried out at a predetermined distance from the crest of each loop, characterised in that a terminal enlargement is provided on at least one of the two thread extremities which are formed by cuttng one arm of a thread loop in order to form a hook.

66/70. Pilkington Brothers Limited (Lancashire, U.K.).—Improvements in or relating to the toughening of glass. (24th June 196[illegible] U.K.). [Class 56 D 1.] 122040

A process for toughening glass by heating glass to its softening point, the heat is then exchange by a cool mixture of oil and a small percentage of a liquid having boiling point lower than flash point of oil, the hot glass sheet of 4 to 12 m.m. thick is quenelied into said mixture and the toughened glass is obtained.

68/70. Merck & Co. Inc. (New Jersey, U.S.A.).—Process for the preparation of (—) (*cis*-1, 2-epoxy propyl) phosphonic acid. [Class 2(iii) B 1 b.] 122041.

In the process for manufacturing (—) (*cis*-1, 2-epoxy-propyl)-phosphonic acid by growing a [=D (*cis*-1, 2-epoxy propyl)-phosphonic acid producing microorganism in an Aqous nutrient medium under aerobic condition, nurient medium is mixed with one or more organic acids or salts to increase the production of said antibiotic. The process is continued until sufficient. Antibiotic activity

iss imparted to said medium the microorganism used is sttreptomyces and acid used is acetic. Pyruvic, malic, fumaric, succinic, aketoglutaric, glutamic, or oxalacetic acid.

120/70. Ciba Limited (Basle, Switzerland).—Method of improving cotton plantations by combating weeds. [Class 81 (i) D.] 122042.

Method of improving cotton plantations by combating weeds which comprises applying to the plantations a compound *e.g.* aryl ureas either alone or in admixture with carriers or additives.

229/70. Wm. R. Stewart & Sons (Hacklemakers) Limited (Dundee, Scotland).—Improvements relating to carding, drawing and other machines and a method of fixing pins in a matrix. [Class 120 (iii) B.] 122043.

A method of inserting pins in the matrix of a carding, fibrillating drawing on other machine, comprising :—(*i*) forming holes in the matrix, which are a clearance fit in relation to pins to be inserted therein ; (*ii*) inserting pins in the holes and aligning them in endwise relation so that their pointed ends confirm to a misform or random selected pattern in each row or certain rows, and securing the pins in position when aligned by means of a filling agent.

250/70. Merck & Co. Inc. (New Jersey, U.S.A.).—Substituted phenylalkanoic acids. [Class 2(iii) H3a 4b.] 122044.

A pharmaceutical composition comprising on inert pharmaceutical carrier and from about 5 m.g. to about 1.5g. of a compound selected from the group consisting of (A) L-α-hydrazino-α-substituted-β-(3, 4, dihydroxy-phenyl)- propionic acid.

313/70. Dr. Karl Thomae G.m.b.H. (Riss, West Germany).—Improvements in or relating to 2-amino-5-nitrothiazoles substituted at the amino group. [Class 2(iii) G4 f.] 122045.

A process for the preparation of a compound *e.g.* 2-amino-5-nitrothiazoles which comprises reacting a substituted 2-methylene-amino-5-nitrothiazole with a diamine.

319/70. Tanabe Seiyaku Co. Ltd. (Osaka, Japan).—Novel derivative of adenine and the preparation thereof. [Class 2(iii) G4 f.] 122046.

A process for preparation of 4-(9-adenyl)-2, 3-dihydroxy-butyric acid and into pharmaceutically acceptable salt which comprises reacting 4-halo-5-nitro-6-amino-pyridine with 4-amino-2, 3-dihydroxy-butyric acid to produce 4-[(6-amino-5-nitro-4-pyrimidyl)-amino]-2, 3-dihydroxybutyric acid reducing the compound into 4-[(5, 6-diamino-4-pyrimidyl) amino]-2, 3-dihydroxy butyric acid and reacting the said acid with thiocarbonate derivative to give 4-(8-mercapto-9-adenyl)-2, 3-dihydroxy-butyric acid.

321/70. Farbenfabriken Bayer Aktiengesellschaft (Leverkusen, W. Germany).—Thiocarbamic acid derivatives. [Class 2(iii) H. 2.] 122047.

A process for the production of a thiocarbamic acid derivatives which comprises reacting a heterocyclic compound with a thiocarbonic acid ester halide.

324/70. Eli Lilly and Company (Indiana Polis, U.S.A.).—Process for preparing 3-mercaptothiazole or mercaptotetrazole cephalosporin and compounds thus obtained. [Class 2(iii) G4 f.] 122048.

Process for preparing 3-mercaptothiazole or mercaptotetrazole cephalosporin and compounds comprising, reacting a cephalosporin compound with a thiol group.

330/70. F. Hoffmann-La Roche & Co. Aktiengesellschaft, (Basle, Switzerland).—Phenyl derivatives. [Class 2(iii)] 122049.

Phenyl derivatives for example and from O-mercapto-benzoic acid and 1-bromo-3, 7-dimethyl- octa-2, 6-diene there is obtained O-[(3, 7-dimethyl-octa-2, dienyl)-thio]-benzoic acid.

331/70. F. Hoffmann-La Roche & Co. Aktiengesellschaft (Basle Switzerland).—Phenyl derivatives. [Class 2(iii) H 2.] 122050.

A process for the manufacture of phenyl derivatives, which comprises reacting with an halide.

339/70. Dynamit Nobel Aktiengesellschaft, (Troisdorf, W. Germany).—Extraction of methyl benzoate. [Class 81(i) E.] 122051.

A process for the extraction of substantially pure methyl benzoate from a starting material, which comprises subjecting the starting material to an oxidative treatment whereby compounds which can only be separated with difficulty be separated by fractional distillation from methyl benzoate.

353/70. Lovens Kemiske Fabrik Produktionsaktieselskab (Ballerup, Denmark).—Method for the production of new sulfamyl-anthranilic acids. (29th April, 1969, U.K.). [Class 2(iii) G. 4 a.] 122052.

A process for the preparation of sulfamyl-anthranilic acids comprising reacting a substituted sulfamyl-benzoic acid with an amine.

369/70. E.I. Du Pont De Nemours and Company (Delaware, U.S.A.).—Selective herbicides. [Class 81(i) D 2.] 122053.

A herbicidal composition useful for the control of undesirable vegetation in rice comprising a herbicidally effective amount of 1-(p -cumyl)-3, 3-dimethyl urea and a herbicidal adjuvant.

378/70. Viktor Konstantinovich Volchkov & Viktor Sergeevich Ryzhkov, (Pervomaiskaya, U.S.S.R.).—Synchronous dynamo-electric machine. [Class 35 A1b1.] 122054.

A rotor for use in a brushless synchronous dynamo-electric machine having at least two claw-tooth pole systems of opposite polarities mounted on a shaft, wherein the shaft portions carrying said pole systems are made of magnetic material which the shaft portion lying between said shaft portion is made of non-magnetic material.

383/70. Institutul De Cercetari Pentru Prelucrarea Titeiului (Republicii, Rumania).—Process for the preparation of a catalyst of the platinum/alumina type for reforming aromatization and isomerization. [Class 1(i) A 2.] 122055.

A process for the preparation of a catalyst of the platinum/alumina type for reforming, aromatization and isomerization process, characterized in that the metal function of the catalyst achieved by depositing a soluble compound of a platinum metal of group VIII of the periodical system such as the hexachloroplatinic acid, on a gamma and/or eta alumina support, is provided to said catalyst in the presence of a competitor exerting no influence upon the acid function, the acid function of the catalyst being provided and controlled by a sequence of treatments in the gascous phase, which consists in : (a) maintaining the platinum metal containing support is a reducing inert medium ; (b) halogenating in a reducing of inert mediums and (c) effecting an oxidizing treatment.

387/70. Vetrocoke Cokapuania S.p.A. & Giuseppe Giammarco (Venice, Italy).—Improved method of purifying gaseous mixtures from acidic compounds. [Class 1(i) G 6]. 122056.

A method of removing carbondioxide and other acid gases from the gaseous mixtures containing them by an absorption stage in which the gaseous mixture is washed with an absorptive solution of suitable chemical composition and a regeneration stage in which the carbon dioxide and other acid gases absorbed are expelled and in which the heat contained in the solution is also used.

402/70. Siemens Aktiengesellschaft (Berlin, W. Germany).—Improvements in or relating to frequency-controlled oscillator circuits. (19th February, 1970, Australia). [Class 40(v) F 1 e]. 122057.

The invention relates to frequency-controlled oscillator circuits of the type in which an oscillator stage can be selective by synchronised to predetermined frequencies in the harmonic spectrum of a crystal-controlled oscillator circuit.

403/70. Mega Power Corporation (New York, U.S.A.).—Magnetomotive electric current generator. [Class 35 B 6 d]. 122058.

An electric generator comprising a tubular core of non-magnetic material, a group of elongate magnetizable metal strips mounted on said core, and angularly spaced from one another about the axis of said core.

428/70. Mueller Co. (Illinois, U.S.A.).—Releasable drive coupling. [Class 80(ii) H. 7]. 122059.

A releasable coupling arrangement for coupling a rotatable driving part of a tool and a work engaging driven part wherein said parts are connectable end-to-end for rotation about an axis of the driving part, the arrangement comprises, a sleeve, a collar, a projection and access connection between said end of said driving part and a threaded connection between said collar.

437/70. Abbott Laboratories (Illinois, U.S.A.).—Sealed container. [Class 125(ii) A9]. 122060.

A sealed container comprising a container neck having a lip, a cap integral with said container, said cap having a rim with a diameter larger than the outside diameter of said lip and a web extending between said container and said cap and sealing said to said container.

482/70. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning (Frankfurt/Main, West Germany).—Water-soluble monoazo dyestuffs and process for preparing them. [Class 2(iii) G4b; 2(iv) Ale]. 122061.

Process for the manufacture of water-soluble monoazo dyestuffs which comprises : coupling a diazotized aromatic amine with a coupling component or converting a monoazo dyestuff into the corresponding sulphuric acid monoester by means of a sulfating agent.

495/70. C.A.V. Limited (Birmingham, U.K.).—Moulding process and apparatus. (5th June, 1969 U.K.) [Class 87(ii) C21]. 122062.

A method of moulding a synthetic resin body to the edge of a body composed of a plurality of juxtaposed sheets comprising inserting the body of juxtaposed sheet into a mulipart mould, closing the mould and thereby causing the ribs on the parts of mould to be brought into sealting engagement with the body inwardly of the edge, a mould cavity, the pressure applied by the ribs being transmitted through the juxtaposed sheets to established seals there between and opening said mould to permit withdrawal of the body.

575/70. Siemens Aktienge sellschaft (Berlin, Germany).—Improvements in or relating transistor amplifiers. (16th December 19 U. K.) [Class 40(iv) 11e]. 122

A circuit arrangement in telecommunication sys in which a receiving amplifier is provided for a rece and the input of the said amplifier is converted to opposite side of a bridge circuit for side tone attenuati a transmitter being connected to the other diagonal the bridge circuit.

579/70. J.H. Fenner & Co., Limited (Yorkshire, U.K.) Improvements in and relating to the fold of flexible sheet materials. (27th June 19 U.K.) [Class 42(i) B]. 1220

Apparatus for forming a fold in a length of flexi sheet material comprising a horizontal support for s porting a length of flexible sheet with a portion thereof be folded lying over a transvers edge of the suppo a horizontal cord arranged above and beyond said edg

594/70. Sandoz Ltd. (Basle, Switzerland).—Impro ments in or relating to 2-alkyl-3-(su tituted phenyl) imidazo thiazole derivati (14th July 1969, U.K.) [Class 2(iii) G 4 1220

A process for the production of 2-alkyl-3-(substitu phenyl) imidazo thiazole derivatives comprising prod ing 3-(alkyl 2-methyl-5, 6-dihydro imidazo [2,1-b] th zole hydrobromide by reacting 3 alkyl -3-hydroxy methyl-2,3,5 6-tetrahydro-imi- dazo[2,1-b] thiazole h drobromide with acetic acid.

602/70. N.V. Philips' Gloeilampenfabrieken (Ei hoven, Holland, Netherland.)—Method of ma facturing an electric discharge tube or an el tric lamp. [Class 39(i) B 1 g 1]. 1220

A method of manufacturing an electric discha tube or an electric lamp starting from a vessel wher a closed holder is placed which is provided with a quan of one or more substances to be introduced into the ves and wherein subsequently a desired gas atmosphere brought about whereafter the vessel is closed and wher finally the holder is opened by the passage of curr through a heating element current in the vessel.

606/70. Ali Sait Oner (Istanbul, Turkey).—Teleph saving box operating automatic telephones w money. [Class 40(iv) E 2]. 122

A telephone saving-box apparatus for operating au matic telephones with money having line cutting c tacts set in series on telephone line circuit dial, microph and receiver contact electrical circuit system.

630/70. Merck & Co., Inc. (New Jersey, U.S.A.) Novel ester derivatives of 3-hydroxy α (1-ami ethyl)-benzyl alcohol and process of prepar thereof. [Class 2(iii) G 5 a]. 12206

The novel compounds can be prepared by re-arran ment of an N-acylated-α-(1-aminoethyl)-benzyl alco or an N-acylated-3- (2-amino-1-chloropropyl) phe under acidic conditions.

644/70. Farbwerke Hoechst Aktiengesellschaft vorm Meister Lucius & Bruning (Frankfur/Ma West Germany).—Thiophene ethers, and p cess for preparing them. [Class 2(iii) G 4 1220

A process for the manufacture of thiophene eth comprising reacting a compound R_1-O-A-X, in which

REGISTRATION OF ASSIGNMENTS, LICENSE ETC. UNDER SECTION 63 OF THE ACT.

In the matter of Patent No. 114779, dated 17th December, 1963 granted to Harold F. Silver and Silver Corporation and subsequently assigned to American Factors Associates Ltd., made in the Register of Patents :—

"In pursuance of an application received on 21st February, 1970 CF & I Engineers Inc., a corporation of the State of Colorado, of 3309 Black Street, Denver, Colorado,

INTERNATIONAL

U.S.A. registered, as proprietors, by virtue of an assignment dated the 4th November, 1969 and made between American Factors Associates Limited of the one part and CF & I Engineers of the other part."

(*ii*)

In the matter of Patent No. 116910 dated 6th October, 1965, granted to Abdul Sattar, Iqbal Mahmood, Iftikhar Ahmad, M. K. Bhatty and Karimullah, the following entry has been made in the Register of Patents :—

"In pursuance of an application received on 2nd May, 1970, Pakistan Council of Scientific and Industrial Research, Pakistan, registered as proprietor by virtue of an assignment dated the 18th April, 1970 and made between Abdul Sattar, Iqbal Mahmood, Iftikhar Ahmad, M.K. Bhatty and Karimullah of the one part and Pakistan Council of Scientific and Industrial Research of the other part."

(*iii*)

In the matter of Patent No. 117439 dated 24th May, 1966, granted to M. Zafar Shah, Mohd. Sarwar, Mohd. Khurshid Bhatty and Karimullah, the following entry has been made in the Register of Patents :—

"In pursuance of an application received on 2nd May, 1970, Pakistan Council of Scientific and Industrial Research, Pakistan, registered as proprietor by virtue of an assignment dated the 14th April, 1970, and made between M. Zafar Shah, Mohd. Sarwar, Mohd. Khurshid Bhatty and Karimullah of the one part and Pakistan Council of Scientific and Industrial Research of the other part."

(*iv*)

In the matter of Patent No. 117839 dated 15th June, 1965, granted to Reckitt & Sons Limited, the following entry has been made in the Register of Patents :—

"In pursuance of an application received on 23rd January, 1971 Reckitt & Colman Products Ltd., a British Company of Dansom Lanem, Hull, Yorkshire, registered as proprieter by virtue of an assignment dated the 11th August, 1970, and made between Reckitt & Sons Limited, of the one part and Reckitt & Colman Products Ltd., of the other part."

(*v*)

In the matter of Patent No. 118116 dated 30th August, 1966 granted to M. Safdar and Mahmood Akbar, the following entry has been made in the Register of Patents :—

"In pursuance of an application received on 2nd May, 1970, Pakistan Council of Scientific and Industrial Research, Pakistan, registered as proprietor by virtue of an assignment dated the 6th April, 1970, and made between M. Safdar and Mahmood Akbar of the one part and Pakistan Council of Scientific and Industrial Research of the other part."

(*vi*)

In the matter of Patent No. 118128 dated 10th November, 1966, granted to M. Manzoor-i-Khuda and N. A. Jeelani, the following entry has been made in the Register of Patents :—

"In pursuance of an application received on 2nd May, 1970, Pakistan Council of Scientific and Industrial Research, registered as proprietor by virtue of an assignment dated 30th March, 1970, and made between M. Manzoor-i-Khuda and N. A. Jeelani, of the one part and Pakistan Scientific and Industrial Research of the other part."

NEW APPLICATIONS FOR PATENTS

The dates shown in the crescent brackets are the dates claimed under Section 78-A of the Act.

11th October, 1971.

716/71. Monsanto Company (Missouri, U.S.A.)—N-phosphonomethylglycine phytotoxicant compositions.

12th October, 1971.

717/71. F. Hoffmann-La Roche & Co. Aktiengesellschaft (Basle, Switzerland).—Phenylalanine derivatives.

718/71. Malik Zulfiquar Ali (Karachi, Pakistan).—Needle jet type carburetto for automobiles using Gas.

13th October, 1971.

719/71. G. M. T. S. A., Le Mans (Sarthe) France).—Apparatus and method for construction of panel structures.

720/71. Takeda Chemical Industries, Ltd. (Osaka, Japan).—Dihydropyrimidopyridazine derivatives.

721/71. E R Squibb & Sons., Inc. (New York, U. S.A.).—Process for preparing cephalosporins.

722/71. The Hong Kong Soya Bean Products Co. Ltd. (Kowloon, Hong Kong).—A blue cheese from soya-bean milk and method of preparation thereof.

723/71. Tecumseh Products Company (Michigan, U. S. A.).—Improvements in electric motors. (19th January, 1971).

724/71. Boehringer Ingelheim Gmbh, (Rhein, West Germany).—Novel process for the production of piperizine derivatives.

725/71. Research Institute for Medicine and Chemistry Inc. (Massachusetts, U.S.A.).—Chemical Process.

726/71. Nayyar Hafeez Faruqui (Karachi, Pakistan).—Motorist Periscope.

14th October, 1971.

727/71. Imperial Chemical Industries Limited (London, U. K.).—Pharmaceutical compositions. (16th October, 1970).

728/71. The Standard Oil Company (Ohio, U.S.A.).—Process for the manufacture of acrylonitrile and methacrylonitrile.

16th October, 1971.

729/71. A. H. Robins Company (Virginia, U. S. A.)—2-(P-Phenylbenzyl) Oxazolines.

730/71. Ginter Corporation (Oregon, U.S.A.).—Temperature Control of flame to avoid noxious products of combustion.

731/71. Farbenfabriken Bayer Aktiengesellschaft (Leverkusen, W. Germany).—Novel (thiono) phosphoric (phosphonic) acid esters, a process for their preparation and their use as insecticides and acaricides.

732/71. Ro-Search Incorporated (North Carolina, U.S..A.).—Improvements in and relating to footwear and its manufacture. (28th October, 1970).

APPLICATIONS ACCEPTED

Notice is hereby given that all persons interested in opposing the grant of Patents on any of the applications referred to below may at any time within four months of the date of this *Gazette of Pakistan* give notice at the Patent Office in the prescribed Form No. 6 of the Patents and Designs Rules, 1933.

The six-figure numbers shown in the right hand side are those given to applications on acceptance of the Complete Specifications and under which the specifications will be printed and subsequent proceedings will be taken.

The figures shown within square brackets after the title of the invention indicate its classification index at acceptance.

Printed copies of the specification are available for sale at the old rate of Re. 1/- per copy (postage extra) direct from the Manager of Publications, Central Publication Branch, Pakistan Secretariat, Block No. 44, Karachi Printed Patent Specifications beginning with No. 111711 will, however, be sold at Rs. 3/- per copy (postage extra if sent out of Pakistan). Requisition for the supply of printed specifications should be accompanied by the six-figure numbers of the specification as shown under this list.

If required, typed copies of the specifications which are open to public inspection can be supplied by the Patent Office on payment of the prescribed charges which may be ascertained on application to the Office.

The dates shown in the crescent brackets are the dates allowed under Section 78-A of the Act.

25/70. Merck & Co., Inc. (New Jersey, U. S. A.).—Process for the preparation of novel epoxyethyl phosphonic acid and (1-lowerakylepoxyethyl) phosphonic acids and the salts an d esters thereof [Class 2(iii) G 3]. 122070.

(1-R_6-epoxyethyl) phosphonic acid compounds prepared by the epoxidation of the (1-R_6-vinyl) phospho nate compound with a chemical oxidising agent where R_6 is hydrogen or loweralkyl or salts, halide esters, pyrophonates.

41/70. Merck & Co., Inc. (New Jersey, U.S.A.).—Preparation of phosphonate antibiotics. [Class 2(iii) H 1 a.) 122071.

A process for the preparation of diastereomers of (1-R_6-epoxyethyl) phosphonic acid which comprises reacting (1-R_6- epoxyethyl) phosphonic acid or a salt thereof with an optically active salt forming base.

45/70. Koho-es Gepipari Miniszterium Tuzelestechnikai Kutatointezet, (Egyetemvaros, Hungary) —Process and cupola furnace for ultilizing hydro carbon-base substitute fuels. [Class 61 (i) A 19 a.] 122072.

Process for utilising hydrocarbon base substitute fuels in cupola furnace wherein smelting coke reduced in quantity by 40 to 60% are fed in furnace. Then waste gas at 1700 to 1800°C., produced by being of hydrocarbon is fed above the blast furnace. Said cupola furnace have a transitional part between a shaft and hearth and a burning chamber having one inlet part of waste gas. Connected to outlet of burning chamber to feed the products of burning chamber above the said blast furnace.

54/70. Kali-Chemie Aktiengesellschaft (Hannover, W. Germany).—3-N-(2-hydroxy-3-phenoxy-propyl)-amino-1-phenyl-1-propanone, its salts and method of preparing the same. (14th November, 1969, U.K.). [Class 2(iii) G 4 f]. 122073.

A method of preparing 3-N-(2-hydroxy-3-phenoxy-propyl)-amino-1-phenyl-1-propanone comprising reacting 2-hydroxy-3-phenoxy propylamine with acetophenone and formaldehyde in the presence of hydrochloric acid in a solvent.

124/70. Pfizer Corporation (Brussels, Belgium).—Substituted Hexahydro-Imidazoquinolines. (19th February, 1969, U.K.). [Class 2(iii) G 4 F]. 122074.

A process for preparing substituted 1, 2, 3, 3a, 4, 5-hexahydro-imidazo [1, 5-a] quinolines characterized-1, 2, 3, 4-tetra hydroquinoline with an aldehyde and then when N-oxide derivatives are being prepared oxidising the product produced to form said N-oxide derivatives.

147/70. Monsanto Company (Missouri, U.S.A.).—Grass selective herbicide composition. (Patent of Addition to No. 117464). [Class 81(i) D. I C]. 122075.

A process of improving rice crop by inhibiting growth of grasses in rice cultivated area characterized by contacting said grasses with from 0.7 to 45 kilos per hectare of (a) 2, 6-diethyl-N-butoxymethyl-alphachloro-acetanilide, (b) 2, 6-diethyl-N-(2-butoxyethyl)-alphachloro-acetanilide and (c) a mixture of (a) and (b).

167/70. The Wellcome Foundation Limited (London, U.K.).—Improvements in or relating to quarternary ammonium salts. (7th March, 1969, U.K.). [Class 2(iii) G. 4 f]. 122076.

Pyrrylvinylthiazolium salts may be prepared by the reaction of a thiazolium compound with an aldehyde. The reaction is preferably carried out in the presence of a basic catalyst. A liquid medium in which the reactants may be dissolved or suspended is conveniently used in this reaction. The temperature is from 20°C to the boiling point of reactive mixture.

177/70. Vsesojuzny Nauchno-Issledovatelsky Institut Legkogo I Textilnogo Mashinostroenia Vniilteknash (Moscow, U.S.S.R.).—Improvements in or relating to a device for laying weft thread in shed in looms. [Class 142(iii) A 14]. 122077.

A device for laying weft thread in shed in looms, comprising ; tubs mounted on both sides of the shed and displaceable towards each other, the tubs having tapering ends and the diameter of each tube being so selected that warp threads forming the shed touch said tube and serve as guide for it, a source of compressed air to create in one tube a pressure flow of air for feeding the end of weft thread and in the other tube- a suction flow for receiving said end ; each of the tubes having from the side of the loom reed a plate which said reed adjoins, the reed also serving as guide for the tube at the moment of drawing together of the tubes.

206/70. Ciba Limited (Basle, Switzerland).—Process for the manufacture of new 9-aminoalkyl-9, 10-dihydro-9, 10-ethano-anthracenes and of their salts, and pharmaceutical preparations containing same. [Class 2(iii) G 4 f]. 122078.

A process for the manufacture of new 9, 10-dihydro 9, 10-ethano-anthracenes which in the 9-position have an amino alkyl radical and in at least one of the positions 1—8 have a free or acylated hydroxyl group wherein a 9-X-9, 10 dihydro 9, 10-ethano-anthracenes which has in at least one of the position 1—8 a free or acylated hydroxyl group and in which X is a radical converted into an amynoalkyl group, the 9, 10 ethano radical is introduced and if desired resulting racemates are separated into the optical antipodes and/or resulting salts converted into the free bases or resulting free bases into their salts.

232/70. Ciba Limited (Basle, Switzerland).—Improvement of crop areas by application of acylated ureas, a process for their preparation and compositions containing them. [Class 81(i) D]. 122079.

A process for the manufacture of acylated ureas, which comprises treating a urea with a reactive functional derivative of an acid in the presence of tertiary base.

334/70. Farbenfabriken Bayer Aktiengesellschaft (Leverkusen, W. Germany).—Process for the production of N-alkyl-1, 4-dihydropyridines. [Class 2(iii) G 4 f]. 122080.

Process for the production of N-alkyl-1, 4-dihydropyridines characterised in that aldehydes and β-ketocarboxylic acid esters are reacted with salts of alkylamines in the presence of an acid acceptor.

336/70. Universal Oil Products Company (Illinois, U.S.A.).—Separation process for olefinic oligomerization and aromatic alkylation. [Class 2(v) B10]. 122081.

Process for recovery of alkylated aromatic compound from an alkylation reaction zone effluent comprising unreactive diluent, alkylatable aromatic compound, and alkylated aromatic compound which comprises : passing said effluent from said reaction zone into a first separation zone ; withdrawing from said first separation zone, a first fraction comprising diluent vapor and a second fraction comprising alkylatable aromatic compound and alkylated aromatic compound ; contacting said first fraction with a lean absorbent hereinafter specified in an absorption zone passing a rich absorbent containing diluent from said absorption zone into said reaction zone ; passing said second fraction into a second separation zone ; withdrawing from said second separation zone, a third fraction comprising alkylatable aromatic compound and a fourth fraction comprising alkylated aromatic compound ; passing a portion of said third fraction into said absorption zone as said lean absorbent specified ; and recovering said fourth fraction.

350/70. Abbott Laboratories (Illinois, U.S.A.).—Erythromycin derivatives. [Class 2(iii) B2b1]. 122082.

A process for preparing a compound which comprises (i) reacting erythromycin with an acid anhydride in the presence of a catalyst at room temperature for 3—10 days or (ii) hydrolysing of 2, 4 di-o-alkanoyl erythromycin.

360/70. Siemens Aktiengesellschaft (Berlin, W. Germany).—Improvements in or relating to magnetic rail-mounted detector devices. [Class 40(i) C 2 a]. 122083.

The invention relates to magnetic rail-mounted detector devices whose operation is dependent upon direction of travel of a railway vehicle and affected by passing wheels, two identical magnetic bridge circuits detunable by passing wheels being provided, each consisting of two magnets in series across an air-gap, a magnetic field indicator being located in the diagonal of each of the bridge, from magnet to magnet.

376/70. Societe Pour La Recherche Et Le Development Technologique S.A. (Nyon, Switzerland).—Production of a continuous molded plastic strip. [Class 87(ii) C21]. 122084.

LAW · TENTH EDITION
rating and Development) 2025-26

The method of producing a continuous molded plastic product which comprises injection molding from a moldable synthetic plastic material a multiplicity of individual upstanding members maintaining said members in a predetermined arrangement, and before the mat rial of said members has set, applying to the bottoms of said members an extrudate of moldable plastic material to form a base support for said upstanding members to the surface of which support said member are integrably attached and from which surface said members project.

479/70. E R Squibb & Sons., Inc. (New York, U.S.A).—α-aminobenzyl penicillins. [Class 2(iii) B2 b3a]. 122085.

Sterile ampicillin trihydrate having a particle size in the range of from about 5 microns to about 100 microns, the majority of the ampicillin trihydrate having a particle size above about 20 microns.

480/70. ACF Chemiefarma N.V. (Amsterda, Netherland).—New 6,7-benzomorphan derivatives, methods for the preparation thereof and new intermediates. [Class 2(iii) H 3 a 1]. 122086.

Process for the preparation of new 6,7-benzomorphans characterised by ring closer under the influence of strong acid reagent of substituted 2-benzyl-4-piperidinols followed by the resolution of the products obtained into optical enantiomers and/or by conversion into salts.

512/70. Simens Aktiengesellschaft (Berlin, W. Germany).—Improvements in or relating to jack strip assemblies. [Class 40(v)]. 122087.

A jack strip assembly comprising a plurality of stackable insulating frames into which a plurality of contact springs, which co-operate in pairs one inserted.

626/70. Vsesojuzny Nauchno-Issledovatelsky Institut Legkogo I Textilnogo Mashinostroenia (Varshavskoe shosse, U.S.S.R.).—A repair for devices inserting weft thread into the warp shed. [Class 142(i) C 6]. 122088.

A rapier for devices inserting weft thread into the warp shed, comprising a tube in a casing, one end of which tube is connected to an attachment generating therein a pressure flow to deliver the end of the weft thread into the warp shed, the free end of said tube projecting from the casing in the direction of the weft thread movement, and the butt of said tube end being scarfed at an angle.

336/71. Syed Abdul Samad and Mujtaba Hussain (Karachi, W. Pakistan).—Self twisting bobbins. [Class 120(iii) D3, A7]. 122089.

Self twisting bobbin having at its upper extremity a disc like adopter with two cuts at the opposite sides for holding the yarn.

343/70. Abdul Khaleque ; Md. Abdul Wahed Miah & Md. Nurul Alam (Dacca, E. Pakistan).—A process for the production of Yohimbine Glycerophosphate. [Class 2(iii) A]. 122090 E.P.

Glycerine is treated with orthophosphoric acid and reacting the resulting glycerophosphoric acid with yohimbine to obtain the product.

344/70. Abdul Khaleque, Mohd. Abdul Wahed Miah and Mohd. Nurul Alam (Dacca, E. Pakistan).—A process for the production of strychnine glycerophosphate. [Class 2(iii) A]. 122091 E.P.

A process for the production of strychnine glycerophosphate comprises treating glycerine with orthophosphoric acid and reacting the resulting glycerophophoric acid ester with strychnine to obtain the product.

541/70. Abdul Khaleque, Md. Abdul Wahed Miah ; Md. Ehsanul Huq ; Khandokar Md. Ismail ; Md. Shafiullah and Manindra Nath Mondal ; (Dacca, E. Pakistan).—A process for the production of scopolamine hydrobromide from Datura Fastuosa seeds. [Class 2(iii) A]. 122092 E.P.

A process for the production of scopolamine hydrobromide from Datura fastuosa seeds comprises extracting powdered seeds with petroleum ether and then with rectified spirit, recovering the solvents, acidifying the resulting concentrate ; separating the non-basic materials by extracting with ethyl acetate ; making aqueous solution alkaline extracting the alkaloid with ethyl acetate ; treating the alkaloid with hydrobromic acid.

SEALING FEES DUE

Notice is hereby given that Patents may now be sealed on the applications referred to below. If it is desired that a Patent should be sealed, a request on the prescribed Form 8 accompanied by the fee of Rs. 30/- should be sent to the Controller of Patents and Designs. "ALL PAKISTAN" FINAL ESTIMATE OF JACK FRUIT FOR THE YEAR 1970-71 RELEASED BY THE MINISTRY OF AGRICULTURE AND WORKS.

JACK FRUIT IS GROWN ONLY IN EAST PAKISTAN

No. PU-F(1)|70.—Area.—In the year, 1970-71 about 43,365 acres were planned to Jack fruit as against 44,440 acres in the year 1969-70 thus representing a decline of 2.4 per cent. The cyclone of Nov., 1970 was mainly responsible for the aforesaid decline in area.

Production.—In the year 1970-71, the production of Jack fruit was estimated at 206,005 tons as against 212,635 tons in the previous year. About 80 percent of the decline in production was attributable to the decline in area while the remaining 20 percent was attributable to the decline in unit yields.

Following is the statement showing Division-wise area and production of Jack fruit in East Pakistan.

"ALL PAKISTAN" FINAL ESTIMATE OF RICE CROP FOR THE YEAR 1970-71 RELEASED BY THE MINISTRY OF AGRICULTURE AND WORKS.

No. PU-E(8)|71.—Area.—According to the final estimate for 1970-71, the area under rice crop has been placed at 28,209,000 acres as against 29,494,000 acres (revised figures) finally reported last year, *i.e.*, 1969-70 thus showing a decrease of 4.4 per cent.

In East Pakistan, the area stands at 24,494,000 acres (IRRI and other high yielding varieties 1,137,000 acres and local 23,357,000 acres) as against 25,486,000 acres (IRRI and other foreign varieties 652,000 acres, local 24,834,000 acres) in the year 1969-70 and shows an overall decrease of 3.9 per cent. The acreage under Aus and Aman crops decreased by 6.8 and 4.4 per cent respectively but area under boro crop increased by 11.1 per cent. The acreage under IRRI and other high yielding varieties increased by 74.4 per cent which is due to the successful introduction of IR-20 under Accelerated Rice Production Programme. Decline in Aus and Aman crops is ascribable to heavy losses caused by floods of July and August, 1970, cyclones and tidal bores. The increase in acreage under boro is due to favourable weather conditions at sowing time, high prices of rice, increased supply of irrigation water, other inputs and Government measures for rehabilitation of coastal districts hit by cyclone of November, 1970.

In West Pakistan, the area under rice has been estimated at 3,715,000 acres as against 4,008,000 acres during last year (revised figures). It shows a decrease of 7.3 per cent.

In Punjab, the area has decreased to 1,824,000 acres from 2,025,000 acres in 1969-70 showing a fall of 9.9 per cent, the reasons during the weather conditions and inadequate supply of canal water at the time of sowing and transplantation.

In Sind, the area has decreased to 1,659,000 acres from 1,738,000 acres (revised figures) of last year thus showing a fall of 4.5 per cent due mainly to shortage of canal water.

In N.W.F.P., the area has increased to 133,000 acres from 130,000 acres (revised figures) of last year showing a rise of 2.3 per cent.

In Baluchistan, the acreage decreased to 99,000 acres as against 115,000 acres reported in the corresponding estimate of last year showing a decrease of 13.9 per cent.

Production.—The production of rice during 1970-71 has been finally estimated at 13,132,000 tons as against 14,179,000 tons (revised figures) finally estimated last year and shows a decrease of 7.4 per cent.

In East Pakistan, the production of rice is estimated at 10,967,000 tons (IRRI 1,505,000 tons, local 9,462,000 tons) as against 11,816,000 tons (IRRI 953,000 tons local 10,863,000 tons) of last year thus showing a decline of 7.2 per cent. The production of Aus and Aman has decreased by 3.4 and 14.9 per cent, respectively, traceable to natural calamities which occurred repeatedly during the season. The production of boro crop, however, increased by 15.2 per cent due to larger acreage under IRRI varieties as well as overall increase in acreage. The production of IRRI varieties increased by 57.9 per cent.

In West Pakistan, the production of rice has been placed at 2,165,000 tons as against 2,363,000 tons of last year (revised figures). It thus shows a decline of 8.4 per cent.

In the Punjab, the production of rice has decreased to 967,000 tons this year as against 1,175,000 tons estimated last year. This shows a decrease of 17.7 per cent, which was mainly due to corresponding decrease in acreage, shortage of canal water supply and absence of rains. There was also incidence of severe attack of stemborer especially where the crop was late.

In Sind, the production of rice is estimated at 1,105,000 tons as against 1,097,000 tons (revised figures) of last year showing a nominal increase of 0.7 per cent which is mainly due to extension of area under improved dwarf varieties.

In N.W.F.P., the production has increased to 65,000 tons from 49,000 tons (revised figures) of last year showing a rise of 32.7 per cent attributed to favourable weather and cultivation of high yielding varieties and use of fertilizers.

In Baluchistan, the production decreased to 28,000 tons from 42,000 tons of last year showing a fall of 41.7 per cent traceable to decreased acreage and unfavourable weather.

Statements showing provincial division-wise acreage and production of rice for 1970-71 are given as follows.
